OBJECTIVE

Second-year Computing & Data Science student at Alexandria University with hands-on experience in full-stack development, database management, and data analysis. Seeking a Summer 2026 internship at Banque du Caire to apply technical skills in a real-world banking environment, contribute to data-driven operations, and gain meaningful exposure to the Egyptian financial sector.

EDUCATION

Alexandria University
Bachelor of Science in Computing and Data Science

- Relevant Coursework: Data Structures, Machine Learning, Database Management, Statistics, Software Engineering

Alexandria, Egypt
Expected May 2027

EXPERIENCE

Freelance Software Developer
Full-Stack Developer

- Managed full software development lifecycles for regional clients — from scoping and UI/UX design to deployment
- Integrated REST APIs and designed relational database schemas with a focus on data integrity and security
- Handled client communication, requirements gathering, and project delivery independently
- Applied clean architecture principles across mobile and web platforms to ensure scalable, maintainable codebases

Sept. 2024 – Present
Remote

PROJECTS

Dr Omar Academy | *React, Tailwind CSS, Supabase (PostgreSQL)*

- Built a production-ready e-learning web platform for a SAT/EST mathematics academy, live and actively serving students
- Architected a PostgreSQL database managing user accounts, course content, enrollment records, and progress tracking
- Implemented secure authentication, role-based access control, and a fully responsive UI
- Delivered a complete client-facing product from requirements gathering to deployment

2025

Trucker — Logistics & Shipment Tracking App | *Flutter, Firebase, Google Maps API*

- Developed a real-time truck and shipment tracking app with live location updates and dynamic route management
- Integrated order management and payment flows — simulating transaction logic similar to fintech and banking systems
- Managed complex state synchronization across multiple user roles: driver, admin, and client

2025

Clinic Booking System | *Flutter, Firebase, SQL*

- Built a secure medical booking platform with real-time appointment management and structured database schema
- Implemented data validation and privacy controls paralleling core banking data management requirements

March 2026

TECHNICAL SKILLS

Data & Analytics: SQL, Python, Data Analysis, Statistics, Microsoft Excel
Languages: Dart, Python, JavaScript, HTML/CSS, SQL
Frontend: React, Tailwind CSS, Flutter
Backend & Databases: Supabase (PostgreSQL), Firebase, REST APIs
Tools: Git, VS Code, Google AI Studio, Android Studio
Core Strengths: Database Design, Clean Architecture, State Management, UI/UX Design

CERTIFICATIONS

AWS Academy Graduate | Cloud Computing Technical Training
ITIDA Gigs Freelance Training | 3-Month Professional Development Program
