Objective

Computing & Data Science student at Alexandria University building Flutter apps through freelance client work and an intensive mobile development diploma. Looking for a **Mobile Development** internship where I can keep shipping real features and learn from an engineering team.

Education

Alexandria University — Alexandria, Egypt
B.Sc. in Computing and Data Science — *Expected May 2027*

- Relevant Coursework: Data Structures, OOP, Machine Learning, Database Management, Software Engineering, Computer Networks

Experience

Freelance Platforms (Mostaqel, Khamsat) — Remote
Freelance Software Developer — *Sept. 2024 – Present*

- Delivered software for real clients end to end, from requirements and implementation to testing and post-delivery support, including a live e-learning LMS built with React and Supabase.
- Worked with mobile development, databases, REST APIs, and cloud services across different tech stacks.

Projects

Movies App: Graduation Project, Route Academy | *Flutter, Bloc, Clean Architecture, Firebase, Dio* — 2026

- Building a movie discovery app from a Figma design as a team project, collaborating with other developers through Git feature branches and pull requests into a shared develop branch.
- Built the onboarding flow, bottom navigation, and authentication screens (login, register, reset password) with multi-language support, structured with Clean Architecture and Bloc.

E-Commerce App | *Flutter, Dart, REST APIs, Token Authentication* — 2026

- Built a shopping app from a Figma design covering splash, sign in, sign up, home, categories, product list, product details, and cart screens.
- Connected the app to a REST API with token-based authentication, fetching products and categories and handling the login flow.

Evently: Events App | *Flutter, Dart, Provider, Firebase, Localization* — 2026

- Built an events app from a Figma design with Provider state management, localization, and light/dark theming.
- Integrated Firebase for authentication and real-time data, connecting the UI to a live backend.

News: News Reader App | *Flutter, Dart, Provider, REST APIs* — 2026

- Built a news app from a Figma design that fetches, parses, and displays live articles from a REST API, with Provider state management and localization.

Islami: Islamic Content App | *Flutter, Dart, Provider, Localization* — 2026

- Built Quran, Hadeth, Sebha, and Radio screens from a Figma design, with multi-language support and a light/dark theme that persists across sessions.

Technical Skills

Mobile: Flutter, Dart, Java, Kotlin (basics), OOP, Provider, Bloc, Clean Architecture, Firebase, Material 3, Android Studio
Backend & DB: Supabase (PostgreSQL), REST APIs, SQL, Firebase Realtime DB
Web & Data: React, JavaScript, Python, Scikit-Learn, Pandas, Tailwind CSS
Tools: Git, GitHub, AWS, Figma, Postman
Languages: Arabic (Native), English (Professional Working Proficiency)

Certifications & Training

Mobile Development Diploma | Route Academy: Flutter, Dart, Kotlin — 2025 – Present

Generative AI Training | CIB Summer Internship Program — July 2026

AWS Academy Graduate | Cloud Computing Technical Training — 2026

ITIDA Gigs Freelance Training | 3-Month Professional Program — 2026
